

Programme Management Services

TRUSTECH Programme Management Services operates at two levels.

Strategic. Programme Management Services are available to lead or support high value multi-partner funding bids in the health and social care innovation fields, providing creative input, shape consortia by identifying strategic partners, along with bid writing, process design and funding analysis to help ensure a successful bid.

Delivery. Programme delivery can be provided by the **Programme Management Services** team. Typically this will involve recruitment and orientation of project staff to deliver the project, setting up IT systems and business processes, knowledge capture, reporting and monitoring to ensure full auditability. Once established the staff, systems and processes can be transferred to clients if they are then adopted as in-house services.
